## SAFETY FOR YOUR FEET?.... WHY?

Safety footwear has become an unavoidable part of life for many dangerous professions. Without safety footwear, there would undoubtedly be far more instances of protruding nails penetrating feet, and crushed toes from heavy weight. If not for properly supported, solid safety footwear, these regular accidents would be far more severe, and cause far more problems for the employees concerned.

Safety footwear is designed for the sole purpose of protecting the FOOT in dangerous situations, whether directly or indirectly. So make them essential to own, particularly if you are involved in dangerous or risky trades such as construction, or any form of dangerous manual labour.
